We've Reinvented the Baby Changing Station — Again.

Koala Kare combined our decades-long commitment to compliance with our passion for accommodating families to create our newest baby changing stations. Thanks to direct input from architects and end-users, we've developed our most innovative products ever.

Exclusive Craftsmanship

The KB310/KB311 line represents Koala's investment in unparalleled craftsmanship. The one-piece, deep-drawn, uniform grain stainless steel components eliminate seams, sharp edges and weld lines, and provide a modern visual aesthetic.

Thoughtful patron amenities enhance the end-user experience, and include a redesigned liner dispenser and a convenient bag hook for safely storing a diaper bag off the floor.

Spring mechanism allows for easy liner loading and dispensing

Handles are designed to ensure ADA compliance

KB310/311 Specifications

- Fully compliant with ADA requirements. Meets ASTM and EN Safety Standards.

- Unit has minimal deflection from 90 degrees. Has been tested to support 300lbs (137kg).
- External bag hook is a solid stainless steel rod with satin finish.

- Bed surface manufactured with Microban® antimicrobial product protection and the efficacy of additives has been confirmed by ISO 22196 testing.

Please note: This product is designed for infants only, up to 3.5 years of age and weighing less than 50 lbs (23kg).

Compliance

The new units have been designed to meet a comprehensive range of global accessibility requirements

Forward Reach

When closed, the handles are below 48" (1219mm) and guide patrons to operate the unit with less than 5lbs of force. The internal liner dispenser will be below 44" (1117mm).

ADAS/TAS/ANSI 2009/2017 308.2

Protruding Objects

Both the leading edge of the surface mounted unit and the handles on the horizontal unit, when open, fall below 27" (685mm), allowing for cane detection. The recessed unit when closed does not protrude more than 4" (101mm).

ADAS/TAS/ANSI 2009/2017 307

Knee and Toe Clearance

For wheelchair access, the space between the handles provides more than 30" (762mm) of width and the under side of the unit is over 27" (685mm) above the finished floor. The open unit provides more than 17" (431mm) of depth for toe clearance.

ADAS/TAS/ANSI 2009/2017 306

Deep-drawn corners eliminate the need for plastic cornering

Stainless steel external bag hook included

Exclusive Microban® antimicrobial protection reassures patrons with the promise of hygienic surfaces

Integral frame offers exceptional bed stability with minimal deflection.
